

About Swiftcore

SwiftCore is a Toronto-based data solutions agency dedicated to bridging the technical knowledge gap in the non-profit sector. We help your organization become highly efficient in its digital operations, ensuring you get the best use of your data to drive better fundraising and program outcomes. By streamlining your systems, we accelerate the vital work and positive impact you deliver to the community every day.

Data Solutions

Maximize your modern CRM and data ecosystem to eliminate manual tracking, build data trust, and uncover deep insights.

➤ CRM Setup & Configuration

Tailoring platforms (such as Salesforce, Dynamics 365, or Raiser's Edge) to match both your fundraising pipelines and your front-line operational workflows.

➤ Connected Platforms (Integrations)

Enable seamless communication between your daily-use platforms (e.g., CRM, marketing, SharePoint) to automatically sync information and remove the burden of manual data entry.

➤ Data Analysis & Reporting

Real-time dashboards built to replace manipulated spreadsheets, giving leadership teams clear, data-driven visibility into strategic goals.

➤ Constituent Insights

Automatically generate and analyze behavioral profiles, volunteer trends, and engagement metrics to target outreach effectively.

Operations Support

Modernize your digital workspace to enhance staff collaboration, enforce data security, and eliminate day-to-day technical friction.

➤ SharePoint Solutions

Reorganizing file management from fragmented, messy folder structures into a structured corporate intranet.

➤ AI-Powered Knowledgebase

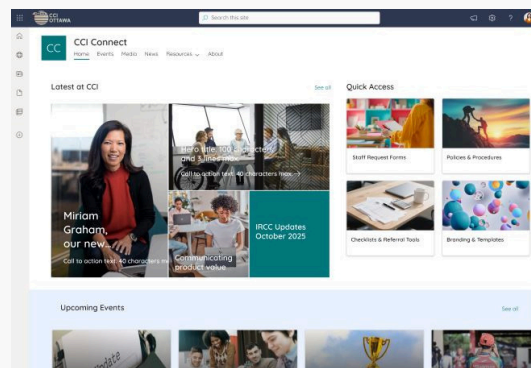

Securely retain and share institutional knowledge across your team, ensuring vital organizational expertise remains instantly accessible through natural language.

Why SwiftCore?

We measure our success by the positive community impact our non-profit partners achieve. As your long-term strategic innovation partner, we handle the technical complexities so you can focus entirely on accelerating your mission and delivering vital services.

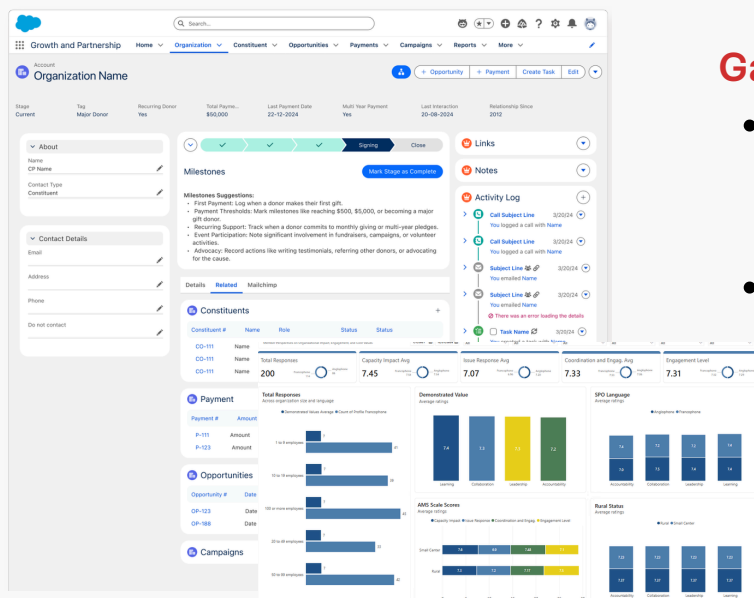

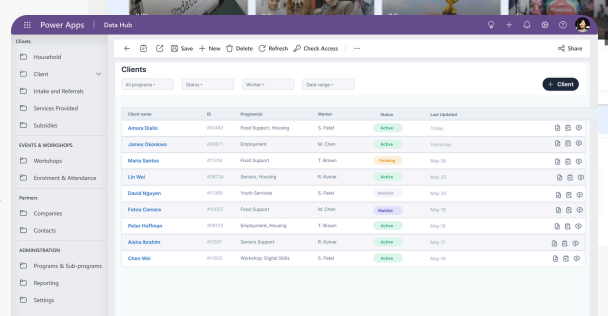

Catholic Center for Immigrants

- Centralized knowledge into an AI Knowledgebase and modern SharePoint hub.
- Facilitated Office 365 adoption through staff training.

Caledon Community Services

- Centralizing client intake, case management, and providing cross-program visibility.
- Unifying program databases and generating real-time dashboard reports.

Gakino'amaage: Teach For Canada

- Streamlined the digital ecosystem to reduce software costs and facilitated Google Workspace adoption.
- Centralized organizational data into Salesforce CRM and developed internal user documentation.

You are in Good Company
